USE OF STUDENT PHOTOGRAPHS
FOR PUBLICITY PURPOSES

At various times throughout your child’s primary school years, the school would like to provide the press with photographs and articles that promote the achievements of individual students or groups of students or otherwise gives publicity to the school.

Last year we included many photos of our students on our new website. We need to promote our school at every opportunity and we would like to include new photos of our students. No student names or any other identifiable information will be on the website.

We are aware that there may be some personal reasons that a parent would not want a photo used in this manner. As such we are adopting the practice of having parental permission for the use of student photographs outside of the school. Please contact the Principal should you require further information.

Please circle and sign below to give permission or otherwise to use a photo of your child/children for publicity purposes outside the school.
